

nugevia

Press Kit

At Nugevia, we harness synergistic ingredient combinations with our revolutionary JOTROL™ micellar technology to create precision engineered supplements that enhance cellular resilience and optimize performance. Our scientifically formulated products deliver unparalleled bioavailability—transforming how active ingredients like resveratrol cross the blood-brain barrier to support your body's vital systems.

We've developed an elite approach to wellness based on intelligent stacking of key compounds, ensuring you experience benefits that single-ingredient supplements simply cannot provide.

Built on Jupiter Neurosciences' pharmaceutical expertise and driven by rigorous scientific research, we create premium supplements that represent the pinnacle of longevity science. Because maintaining peak performance shouldn't be left to chance—it should be sophisticated, evidence-based, and precisely delivered to where your body needs it most.

CORE VALUES

Scientific Synergy

Nugevia's approach centers on extensive pharmaceutical research of JOTROL™, our patented resveratrol formulation, that in an FDA regulated Phase I clinical trial showed an unprecedented increase in bioavailability as judged by the maximum concentration in blood (9 X). We "cracked the code" for resveratrol to be an effective treatment in many CNS related indications and JOTROL™ is now entering a Phase II Clinical trial in Parkinson's patients. We are using JOTROL™ as the cornerstone in all our formulations and selectively combined it with complementary and synergistic natural compounds that target the specific treatment aspects on which we are focused.

Advanced Micellar Technology

We are committed to maximizing efficacy through our proprietary JOTROL™ micellar technology, ensuring that premium ingredients like resveratrol effectively cross the blood-brain barrier for optimal performance and cellular resilience.

Precision & Transparency

Our products are formulated with meticulous attention to detail in state-of-the-art facilities that adhere to pharmaceutical-grade standards. We openly share the scientific rationale behind our formulations, empowering customers with knowledge about the sophisticated solutions they're investing in.

Intelligent Optimization

We continuously pursue innovative ways to enhance human performance and longevity, creating formulations that address interconnected cellular processes rather than isolated symptoms or systems.

NUGEVIA PRODUCT RANGE

A man and a woman are walking together in a park, smiling and looking at each other. The man has a beard and is wearing a white t-shirt, while the woman has blonde hair in a ponytail and is also wearing a white t-shirt. They are walking on a path with trees in the background. The entire image is overlaid with a dark blue tint. On the right side, there is a large, stylized graphic of a DNA double helix structure, rendered in a lighter blue color. The word "nugevia" is centered over the couple in a white, lowercase, sans-serif font.
